When assigning new address 1. Got to nearest property with an esisting address. 2. Measure distance from nearest property driveway to the new driveway. 3. Take measurement and divide by 5, disregard decimal. 4. This number is the difference between existing address and new address. Add the number if the new property is up the road or subtract the number if new property is down the road. Be sure you know direction the road is numbered and adjust for odd or even side of road.

_____divide by 5          _____+/-          _____=          _____
